Editors

Professor Roland W. Lewis
School of Engineering, University of Wales Swansea,
Swansea SA2 8PP, UK (*E-mail:* G.Power@swansea.ac.uk)

Professor Ted Belytschko
Department of Mechanical Engineering, Northwestern University
Evanston, IL 60208, USA (*E-mail:* ijnme-us@northwestern.edu)

Associate Editors

Professor René de Borst
Koiter Institute Delft, Delft University of Technology
P.O. Box 5058, NL-2600 GB Delft, The Netherlands
(*E-mail:* ijnme@LR.TUDelft.nl)

Professor Charbel Farhat
Department of Aerospace Engineering Sciences, Center for Aerospace Structures, University of Colorado at Boulder, Campus Box 429, Boulder, CO 80309-0429, USA (*E-mail:* charbel@alexandra.Colorado.edu)

Founding Editors

Professor O. C. Zienkiewicz
Department of Civil Engineering, University of Wales Swansea,
Swansea SA2 8PP, UK

Professor R. H. Gallagher†

Editorial Board

J. H. Argyris
Institute for Computer Applications,
Stuttgart, Germany

J. S. Arora
University of Iowa,
Iowa City, USA

I. Babuska
University of Texas at Austin, USA

K. J. Bathe
MIT, Cambridge, MA, USA

J. L. Batoz
Universite de Technologie Compiegne,
Compiegne, France

Z. P. Bažant
Northwestern University,
Evanston, IL, USA

M. P. Bendsoe
Technical University of Denmark,
Lyngby, Denmark

D. Beskos
University of Patras, Greece

G. F. Carey
University of Texas at Austin, USA

J. L. Chenot
ENSM de Paris, Valbonne, France

International Journal for
Numerical Methods in Engineering

Volume 60 Number 1 • 7 May 2004

Special Issue on The Fifth World Congress on Computational Mechanics
Guest Editors: Josef Eberhardsteiner, Herbert A. Mang & Franz G. Rammerstorfer

Preface: H. A. Mang, J. Eberhardsteiner and F. G. Rammerstorfer 1

The birth of the finite element method and of computational mechanics: O. C. Zienkiewicz 3

The precise computation for wave propagation in stratified materials: W.-X. Zhong, J. H. Lin and Q. Gao 11

Multiphase flow in deforming porous material: B. A. Schrefler 27

Response surface method for probabilistic assessment of metal forming failures: M. Kleiber, J. Knabel and J. Rojek 51

Node-by-node parallel finite elements: a virtually meshless method: G. Yagawa 69

Adaptive finite element analysis and modelling of solids and structures. Findings, problems and trends: E. Stein, M. Rüter and S. Ohnimus 103

Reduced models for fluid-structure interaction problems: R. Ohayon 139

Variational time integrators: A. Lew, J. E. Marsden, M. Ortiz and M. West 153

Finite element developments for general fluid flows with structural interactions: K.-J. Bathe and H. Zhang 213

Multiscale modelling and computational mechanics: P. Ladevèze 233

Possibilities of finite calculus in computational mechanics: E. Oñate 255

Early history of the finite element method from the view point of a pioneer: R. W. Clough 283

Cohesive-zone models, higher-order continuum theories and reliability methods for computational failure analysis: R. de Borst, M. A. Gutiérrez, G. N. Wells, J. J. C. Remmers and H. Askes 289

The modelling of multi-fracturing solids and particulate media: D. R. J. Owen, Y. T. Feng, E. A. de Souza Neto, M. G. Cottrell, F. Wang, F. M. Andrade Pires and J. Yu 317

Mixed-enhanced formulation for finite deformation axisymmetric-torsion: E. P. Kasper and R. L. Taylor 341

Computational mechanics applied to interaction problems: S. Valliappan 361

Shell structures – a sensitive interrelation between physics and numerics: E. Ramm and W. A. Wall 381

The *International Journal for Numerical Methods in Engineering* is covered by the following abstracting and indexing services:

Applied Mechanics Reviews, BHRA Fluid Engineering Centre (Elsevier), Cambridge Scientific Abstracts/Materials Information, CompuMath Citation Index® (ISI), Current Contents®/Engineering, Computing & Technology (ISI), Earthquake Engineering Abstracts (NISEE), Ei COMPENDEX PLUS, Ei Page One, Geobase (Elsevier), Geotechnical Abstracts (Geotext Services), Indian Society of Earthquake Technology Bulletin, INSPEC, International Aeronautical Abstracts & Database (AIAA), International Civil Engineering Abstracts (Emerald), International Petroleum Abstracts, ISI Alerting Services, Materials Science Citation Index (ISI), Mathematical Reviews, Mechanics, PASCAL Database (INIST), Science Citation Index Expanded (also known as SciSearch®) (ISI), Science Citation Index® (ISI), Shock & Vibration Digest (Sage), Tribology and Corrosion Abstracts, Zentralblatt für Mathematik/Mathematics Abstracts.

IJNMBH 60 1–2566 (2004) • ISSN 0029-5981 • Copyright © 2004 John Wiley & Sons, Ltd

Volume 60 Number 2 • 14 May 2004

Constitutive modelling and numerical simulation of multivariant phase transformation in superelastic shape-memory alloys: Y. Jung, P. Papadopoulos and R. O. Ritchie 429

A return map algorithm for general isotropic elasto/visco-plastic materials in principal space: L. Rosati and N. Valoroso 461

A new path-following constraint for strain-softening finite element simulations: E. Lorentz and P. Badel 499

Multi-lithology stratigraphic model under maximum erosion rate constraint: R. Eymard, T. Gallouët, D. Granjeon, R. Masson and Q. H. Tran 527

Comparative studies of 3D-constitutive models for concrete: application to mixed-mode fracture: P. Pivonka, J. Ožbolt, R. Lackner and H. A. Mang 549

Volume 60 Number 3 • 21 May 2004

Generalized polynomial chaos and random oscillators: D. Lucor, C.-H. Su and G. E. Karniadakis 571

Anisotropic mesh adaptation by metric-driven optimization: C. L. Bottasso 597

Adaptive embedded unstructured grid methods: R. Löhner, J. D. Baum, E. Mestreau, D. Sharov, C. Charman and D. Pelessone 641

Prediction of stress-strain relation using cone identation: effect of friction: A. DiCarlo, H. T. Y. Yang and S. Chandrasekar 661

Geometry independence for a meshing engine for 2D manifolds: R. B. Simpson 675

Free vibrations of solid and hollow wedge beams with rectangular or circular cross-sections and carrying any number of point masses: J.-S. Wu and L.-K. Chiang 695

Volume 60 Number 4 • 28 May 2004

Boundary element formulation for 3D transversely isotropic cracked bodies: M. P. Ariza and J. Dominguez 719

Global formulation of 3D magnetostatics using flux and gauged potentials: M. Repetto and F. Trevisan 755

On singularities in the solution of three-dimensional Stokes flow and incompressible elasticity problems with corners: A. Dimitrov 773

The ultraweak time coupling in non-linear multiphysics modelling and related optimization problems: Y. Favennec, V. Labbé and F. Bay 803

Computational method for atomistic homogenization of nanopatterned point defect structures: P. W. Chung 833

Volume 60 Number 5 • 7 June 2004

Stabilized conforming nodal integration in the natural-element method: J. W. Yoo, B. Moran and J.-S. Chen 861

Mixed plate bending elements based on least-squares formulations: J. P. Pontaza and J. N. Reddy. 891

A 3D anisotropic elastoplastic-damage model using discontinuous displacement fields: J. Mosler and O. T. Bruhns 923

A fully explicit characteristic based split (CBS) scheme for viscoelastic flow calculations: P. Nithiarasu 949

Multi-precision Laplace transform inversion: J. Abate and P. P. Valkó 979

Numerical simulation of the motion of a two-dimensional glacier: M. Picasso, J. Rappaz, A. Reist, M. Funk and H. Blatter 995

Volume 60 Number 6 • 14 June 2004

Aeroelastic forces and dynamic response of long-span bridges: M. Lazzari, R. V. Vitaliani and A. V. Saetta 1011

Generation and adaptation of computational surface meshes from discrete anatomical data: P. J. Frey 1049

A conservative integral for bimaterial notches subjected to thermal stresses: L. Banks-Sills and C. Ishbir 1075

A stabilized volume-averaging finite element method for flow in porous media and binary alloy solidification processes: N. Zabaras and D. Samanta 1103

Quality improvements in extruded meshes using topologically adaptive generalized elements: S. Chalasani and D. M. Thompson 1139

Volume 60 Number 7 • 21 June 2004

Subdivision schemes for smooth contact surfaces of arbitrary mesh topology in 3D: M. Stadler and G. A. Holzapfel 1161

A contact algorithm for the Signorini problem using space-time finite elements: P. D. Pattillo II and D. A. Tortorelli 1197

Boundary layer in shape optimization of convective fins using a meshfree approach: F. Bobaru and S. Rachakonda 1215

A new triangular element to model inter-laminar shear stress continuous plate theory: A. Chakrabarti and A. H. Sheikh 1237

Algebraic grid generation on trimmed parametric surface using non-self-overlapping planar Coons patch: C. C. L. Wang and K. Tang 1259

Adaptive strategies and error control for computing material forces in fracture mechanics: P. Heintz, F. Larsson, P. Hansbo and K. Runesson 1287

Optimization by random search with jumps: C. Li, R. Premier and K.-H. Cheng 1301

Volume 60 Number 8 • 28 June 2004

A novel technique for determination of histories of SIF distributions along 3D crack fronts of a body subjected to thermal shock: Y.-L. Lu, X.-P. Huang, C.-D. Lu and X.-H. Weng 1317

Integral representations in elastostatics and their application to an alternative boundary element method: S. Turteltaub and M. Turteltaub 1339

Block preconditioners for symmetric indefinite linear systems: K.-C. Toh, K.-K. Phoon and S.-H. Chan 1361

Study on semi-conjugate direction methods for non-symmetric systems: Y.-H. Dai and J. Yuan 1383

Object-oriented hierarchical mesh refinement with CHARMS: P. Krysl, A. Trivedi and B. Zhu 1401

Mesh-free simulation of ductile fracture: B. C. Simonsen and S. Li 1425

A new extension of the natural element method for non-convex and discontinous problems: the constrained natural element method (C-NEM): J. Yvonnet , D. Ryckelynck, P. Lorong and F. Chinesta 1451

Volume 60 Number 9 • 7 July 2004

On the Galerkin formulation of the smoothed particle hydrodynamics method: L. Cueto-Felgueroso, I. Colominas, G. Mosqueira, F. Navarrina and M. Casteleiro 1475

Evaluating the LCD algorithm for solving linear systems of equations arising from implicit SUPG formulation of compressible flows: L. Catabriga, A. L. G. A. Coutinho and L. P. Franca..... 1513

A fast integral approach for drag force calculation due to oscillatory slip stokes flows: J. Ding and W. Ye 1535

Stochastic inverse heat conduction using a spectral approach: V. A. B. Narayanan and N. Zabaras.. 1569

Analysis of transfer procedures in elastoplasticity based on the error in the constitutive equations: Theory and numerical illustration: A. Orlando and D. Perić..... 1595

Volume 60 Number 10 • 14 July 2004

John Argyris: I. Doltsinis 1633

p-version of the generalized FEM using mesh-based handbooks with applications to multiscale problems: T. Strouboulis, L. Zhang and I. Babuška 1639

An eddy-current and micromagnetism model with applications to disk write heads: J. Sun, F. Collino, P. B. Monk and L. Wang..... 1673

A new unified theory underlying time dependent linear first-order systems: a prelude to algorithms by design: X. Zhou and K. K. Tamma..... 1699

Complex three-dimensional microstructural permeability prediction of porous fibrous media with and without compaction: N. D. Ngo and K. K. Tamma 1741

Finite element method for mixed elastohydrodynamic lubrication of journal-bearing systems: W. K. Liu, S. Xiong, Y. Guo, Q. J. Wang, Y. Wang, Q. Yang and K. Vaidyanathan 1759

Volume 60 Number 11 • 21 July 2004

Material instability in fatigue of fiber composites: A. Tesar..... 1791

Wavefront reduction using graphs, neural networks and genetic algorithm: A. Kaveh and H. A. Rahimi Bondarabady 1803

Refined 15-DOF triangular discrete degenerated shell element with high performances: C. Wanji 1817

Modified modal methods for calculating eigenpair sensitivity of asymmetric damped system: Y.-J. Moon, B.-W. Kim, M.-G. Ko and I.-W. Lee 1847

Mesh-free radial point interpolation method for the buckling analysis of Mindlin plates subjected to in-plane point loads: K. M. Liew and X. L. Chen..... 1861

Multi-scale analysis and FE computation for the structure of composite materials with small periodic configuration under condition of coupled thermoelasticity: Y.-P. Feng and J.-Z. Cui..... 1879

Adhesive element modelling and weighted static shape control of composite plates with piezoelectric actuator patches: D. Sun and L. Tong 1911

Comparison of regularization methods for solving the Cauchy problem associated with the Helmhotlz equation: L. Marin, L. Elliott, P. J. Heggs, D. B. Ingham, D. Lesnic and X. Wen 1933

Volume 60 Number 12 • 28 July 2004

Solution of a multidimensional inverse radiation problem by means of mode reduction: H. M. Park and M. C. Sung 1949

Procedures for approximate eigenproblem reanalysis of structures: U. Kirsch and M. Bogomolni 1969

Bifurcation points and bifurcated branches by an asymptotic numerical method and Padé approximants: E. H. Boutyour, H. Zahrouni, M. Potier-Ferry and M. Boudi 1987

Studies of the strong coupling and weak coupling methods in FSI analysis: Q. Zhang and T. Hisada 2013

Truncation error and stability analysis of iterative and non-iterative Thomas-Gladwell methods for first-order non-linear differential equations: D. Kavetski, P. Binning and S. W. Sloan 2031

Three-dimensional finite element computations for frictional contact problems with non-associated sliding rule: M. Hjiaj, Z.-Q. Feng, G. de Saxcé and Z. Mróz 2045

Numerical integration in Natural Neighbour Galerkin methods: D. González, E. Cueto, M. A. Martínez and M. Doblaré 2077

Volume 60 Number 13 • 7 August 2004

Updated Lagrangian free surface flow simulations with natural neighbour Galerkin methods: M. A. Martínez, E. Cueto, I. Alfaro, M. Doblaré and F. Chinesta 2105

Rayleigh wave correction for the BEM analysis of two-dimensional elastodynamic problems in a half-space: I. Arias and J. D. Achenbach 2131

A model updating strategy of non-linear vibrating structures: G. Kerschen and J. C. Golinval 2147

Gradient method for inverse heat conduction problem in nanoscale: S. K. Kim and I. M. Daniel 2165

A mesh free approach using radial basis functions and parallel domain decomposition for solving three-dimensional diffusion equations: M. S. Ingber, C. S. Chen and J. A. Tanski 2183

A simple boundary element method for problems of potential in non-homogeneous media: A. Sutradhar and G. H. Paulino 2203

A semi-implicit time-stepping model for frictional compliant contact problems: P. Song, J.-S. Pang and V. Kumar 2231

Volume 60 Number 14 • 14 August 2004

Numerical analysis of Augmented Lagrangian algorithms in complementary elastoplasticity: L. Contrafatto and G. Ventura 2263

A geometry projection method for shape optimization: J. Norato, R. Haber, D. Tortorelli and M. P. Bendsøe 2289

Finite element formulation for modelling large deformations in elasto-viscoplastic polycrystals: K. Matouš and A. M. Maniatty 2313

A constraint-stabilized time-stepping approach for rigid multibody dynamics with joints, contact and friction: M. Anitescu and G. D. Hart 2335

On error estimator and *p*-adaptivity in the generalized finite element method: F. B. Barros, S. P. B. Proença and C. S. de Barcellos 2373

Simulation of crack growth in composite material shell structures: S. Charoenphan, M. E. Plesha and L. C. Bank 2399

Volume 60 Number 15 • 21 August 2004

On the design of energy–momentum integration schemes for arbitrary continuum formulations. Applications to classical and chaotic motion of shells: C. Sansour, P. Wriggers and J. Sansour 2419

A freeform shape optimization of complex structures represented by arbitrary polygonal or polyhedral meshes: J. Shen and D. Yoon 2441

A spectral-element method for modelling cavitation in transient fluid–structure interaction: M. A. Sprague and T. L. Geers 2467

A 20-node hexahedron element with enhanced distortion tolerance: E. T. Ooi, S. Rajendran and J. H. Yeo 2501

Local modal reduction in explicit dynamics with domain decomposition. Part 1: extension to sub-domains undergoing finite rigid rotations: V. Faucher and A. Combescure 2531
